

Experiment No : 1

1. Title: Demonstrate inline, internal, and external JavaScript; use console methods; create a webpage showing user info and a welcome message.

2. Software/Tools Required: Visual Studio Code (VS Code) Google Chrome/web browser, HTML, JavaScript.

3. Theory: JavaScript is a scripting language used to make web pages interactive. It can be added in three ways:

- Inline JavaScript: Written inside HTML elements.
- Internal JavaScript: Written inside the <script> tag in the HTML file.
- External JavaScript: Written in a separate .js file and linked to the HTML page.
- Console methods like console.log(), console.info(), console.warn(), and console.error() are used for debugging and displaying messages.

4. Output:

5. Result/Conclusion: The experiment was performed successfully. A webpage displaying a welcome message and user information was created using inline, internal, and external JavaScript, and console methods.
